PROFESSIONAL SUMMARY

Electrical Engineering graduate with hands-on experience in data organization, data clean-up, spreadsheets, workflow automation, and AI-assisted development. Detail-oriented and comfortable following structured processes, reviewing information for accuracy, and completing tasks consistently. Fast learner who picks up new tools and workflows independently.

LANGUAGES & CORE SKILLS

Languages: Filipino (Native/Fluent), English (Advanced)
Data & Accuracy: Structured information review, data clean-up, accuracy checking, attention to detail, consistency, following instructions, error identification, data organization
Tools: Google Workspace, Microsoft Office, Claude, GPT, Codex, DeepSeek
Automation & Technical: Google Apps Script, n8n, Zapier, basic Python, C++, Arduino, ESP32/ESP8266, MATLAB
Work Style: Independent problem-solving, critical thinking, adaptability, fast learning, structured workflows

RELEVANT PROJECTS

ISPARK: IoT-based Set-Up Aquaculture Resource Kit — Thesis Project | Bulacan State University | 2023–2024

- Worked with structured sensor data collected through an ESP32-based monitoring system.
- Designed a spreadsheet interface to organize and visualize project data.
- Reviewed and organized technical information while following project requirements and structured workflows.
- Used AI tools to support debugging, script review, and workflow improvement.

AI-Assisted Portfolio & Automation Projects

- Built and iterated personal web and automation projects using AI-assisted development tools.
- Used Claude, GPT, Codex, and DeepSeek for debugging, research, prompt development, testing, and workflow improvement.
- Created practical prototypes involving structured information, data processing, and workflow automation.
- Learned unfamiliar tools and workflows independently through project-based experimentation.

Freelance & Coursework Projects

- Built spreadsheet dashboards with automated reporting features.
- Automated form responses and data clean-up using Google Apps Script.
- Developed small-scale automation workflows to improve efficiency in academic projects.

EDUCATION

Bachelor of Science in Electrical Engineering | Bulacan State University — College of Engineering | 2021–2025

CERTIFICATIONS & AWARD

- Google Workspace Certified
- MATLAB Certified
- Best in Thesis — 1st Placer | 2024–2025
